Compact Controller 100 Secure
Greater Security for Your Automation

Compact Controller 100 Secure

THE BODYGUARD

for Your Systems

All production processes are digitally networked in modern manufacturing facilities. However, this connectivity also increases risk: An attacker may attempt to infiltrate the corporate network with malware to access machine controllers, manipulate processes, and spy on sensitive production data.

To significantly reduce the risk of successful cyberattacks, the Compact Controller 100 Secure was developed to be IEC 62443-4-2 certified. Implementing the defined security requirements ensures a high level of protection, integrity, and trustworthiness in industrial environments. Integrated security mechanisms protect production against tampering and unauthorized access by securing control commands and reliably shielding critical systems.

These security measures successfully repel cyberattacks: Production downtime is avoided, sensitive data is protected, and your industrial system continues operating safely, efficiently, and reliably.

- Certified to IEC 62443-4-2
- Secure communication via encrypted data transmission
- Meets key requirements of the Cyber Resilience Act (CRA) and other compliance projects
- The first of many products in a new security generation
- Part of the WAGO security concept – hardware, software & consulting
